About Westminster:

Westminster Resources is a Latin American focussed mining exploration company. The company is in the process of acquiring a 100% interest in a package of highly prospective copper properties in southern Peru. These properties total over 36,000 hectares within the country's prolific coastal copper belt—source of nearly half of Peru's copper production. Prior work has identified both porphyry and IOCG style mineralization. The company also holds a 100% interest in the 18,000-hectare El Cobre property in Sonora, Mexico, prospective for world-class epithermal and copper-gold porphyry systems.
